I. Installation (Figure 401)

SUBTASK 420-003-A

- (1) Install the cabinet baseplate as follows:

- NOTE:
- Make sure that the cabinet baseplate is back to the same location as that from which it was removed.
  - Start the installation of the cabinet baseplate from the first larger opening of the track slot and from the rear portion to the front portion. Refer to DET. B.
  - Obey the pitch of 1041.4 millimeters (41 inches) between the rows.
  - The pitch between the cabinet baseplates is measured from the front leg of one cabinet baseplate to the front leg of the subsequent cabinet baseplate.

- The distance between the first cabinet baseplate and the windscreens is measured from the front leg of the cabinet baseplate to the windscreens.

- (a) Install the galley fittings (7) at the lateral track (8).
- (b) Install the retainers (12) and stud (11) at the floor track (10).
- (c) Put the cabinet baseplate (1) in a position where the fittings align with the larger openings of the track slot.
- (d) Push the cabinet baseplate (1) down and move it horizontally until it is in the correct position.
- (e) Make sure that the cabinet baseplate (1) is in the correct position and attach the galley fittings (7), outer bushings (6), inner bushings (5), washers (2), lock washers (3), and bolts (4) to the lateral track (8).
- (f) Attach the studs (11), retainers (12), washers (13), outer bushings (14), inner bushings (15), washers (16), and lock washers (17) that attach the cabinet baseplate (1) to the floor track (10).
- (g) Install the track lining sections (9) as applicable.

J. Follow-on

*SUBTASK 842-003-A*

- (1) Do the visual check at the baseplates AMM TASK 25-28-04-200-801-A/600.
